

Safety Boat Training – July 2014

We now have 8 new Safety Boat handlers following a hectic week of theory in Westbury & practicals in Plymouth.

The assessment required everyone to perform a rescue from dinghies, canoes and windsurf boards. Each candidate took their turn in the water awaiting rescue as well.

The comments made at Mount Batten were that they had never had a course run so smoothly and normally at least one person fails this course. We are very proud of our competent youngsters who just got on with getting the kit out and enjoyed learning their new skill.

As always it was a pleasure to take them to Mount Batten – well done guys. There are loads of photos on the gallery pages.
